Course: Local Modified Version - ISuite – This is a non Certificate class

Date(s):   April, 11-13, 2011
Class starting at 1200 Monday April 11th ending
at 1200 on Wednesday April 13th Mountain time.

Location: Vale District B.L.M, Vale, OR.

Nominations: Due January, 28, 2011; submit nominations to the
Coordinator on an NWCG Interagency Training Nomination Form.

Notification of
Selection Date: March, 07, 2011

Target Group: This course is for those people who want to learn about I-Suite and
apply it to their local units. This will be a local modified version
and will include the following modules: Data Administration,
Resources, and Time (both personal and equipment) all other
modules will be covered briefly; there will be a brief time at the
end of session to ask questions about other modules not covered.

Description: The I-Suite computer application consists of a Resource, Cost,
Time, and Incident Action Plan units. These units are integrated,
which means they have a similar user interface, and share a
common database. We will not cover all the units; there will be
extra time as mentioned above to ask questions about modules not
covered. We will use laptops to learn all of the units.

Prerequisites: Good computer skills using Windows are REQUIRED
prerequisites.

Special needs: Each individual will need to provide their own laptop for the class.
All laptops need to have the 2010 **server** version of ISuite
installed. This can be found on the ISuite website on the training
page.
